*Assessment Strategies Inc., Canada's Testing Company, located in Ottawa, is a private corporation with a longstanding reputation of developing and administering high quality licensing, certification and jurisprudence examination programs for clients in a number of professions including provincial/territorial and national regulatory authorities, certification bodies, business and industry associations, and not-for-profit organizations.*

## Senior Consultant—Testing & Measurement (Psychometrician)

Assessment Strategies Inc. is seeking an accomplished expert in test development, measurement and psychometrics. Reporting to the Vice-President, Testing & Measurement, the Senior Consultant will lead and implement complex national client programs, manage and provide expert advice for a range of client programs, and contribute to business development opportunities.

### Key Responsibilities

- Develops, implements and evaluates complex licensure and certification examination programs in accordance with contract deliverables and statements of work.
- Applies best practices and innovation to create and deliver cost-effective client programs and products.
- Leads client programs and teams for large national and complex examination development projects, performs statistical analysis and writes technical reports including opportunities for program improvement.
- Participates in business development opportunities including contributing to writing of proposals.

### Requirements

- PhD in a relevant field such as psychometrics, educational measurement or industrial/organizational psychology.
- Five years of experience in assessment, testing, job analysis, measurement and design.
- Experience with classical test theory and item response theory statistics, including the use of standard statistical packages.
- Bilingualism (English and French) is an asset

### Application Information

Interested individuals should email their confidential cover letter and resume to:
